

Professional 354 Electronic Spray

2-in-1 contact cleaner and lubricant. Non-hygroscopic electrical fluid with active cleaning solvent. Suitable for use in vehicle HV systems. Neutral towards paints and electrically insulating materials. Ensures optimal current flow and prevents current leakage. Minimises oxidation on contact points.

Properties

- ✓ Long-term protection for the entire electrical system
- ✓ Removes water and protects against moisture, dirt and corrosion
- ✓ Prevents leakage currents, electrical breakdowns and excessive transition resistances
- ✓ Protecting and insulating properties
- ✓ Has no effect on paints or plastics
- ✓ Protects copper metals and non-ferrous metals against oxidation

Application area

- ✓ In the event of contact disruptions
- ✓ After every engine wash
- ✓ When working on the electrical system

Instructions

Spray onto contacts or into cable connectors. After spraying, wait a few minutes until the protective and lubricating film has built up on the contacts. Then operate the contacts or mount the connectors.
