microflex® 926 EGR valve cleaner

The innovative XFoam-technology detaches persistent contamination in the exhaust and/or air intake system. Because of significant wetting property, there is a short application time. Extremely good detachment of pollution and excellent flow behavior. Perfect to clean smaller parts, e.g. EGR valves.

XFoam-technology

- 5-times the volume
- extremely good surface wetting
- optimal application time
- excellent flow behavior

features

- excellent cleaning efficiency with carbonaceous residue
- no solvents
- non flammable

operating range

- perfect to clean smaller parts, e.g. EGR valves.

application

- consider service information SI 926 before usage

special facts

- use only in well ventilated room or outdoors
- wear protective gloves, protective clothing, eye protection, face protection
