microflex® 925 EGR system cleaner

The innovative XFoam-technology detaches persistent contamination in the exhaust and/or air intake system. Because of significant wetting property, there is a short application time. Extremely good detachment of pollution and excellent flow behavior. Perfect to clean larger components of the exhaust and/or air intake system (e.g. intake manifold, EGR cooler).

XFoam-technology

- 5-times the volume
- extremely good surface wetting
- optimal application time
- excellent flow behavior

features

- excellent cleaning efficiency with carbonaceous residue
- no solvents
- non flammable

operating range

- perfect to clean larger components of the exhaust and/or air intake system (e.g. intake manifold, EGR cooler)

application

- consider service information SI 925 before usage
- use only with 19310 AGR-pressure cup gun!

special facts

- use only in well ventilated room or outdoors
- wear protective gloves/ protective clothing, eye protection, face protection
