

## Professional 183 System Agent Concentrate

Molecularly active system agent concentrate for all diesel engines. The additive protects the whole fuel system against deposits. It thus ensures optimal fuel consumption and low pollutant emissions.

### Properties

- ✓ Cleans the combustion chamber and outlet valves with the clean-up effect
- ✓ Prevents deposits in the injection area with the keep-clean effect
- ✓ Boosts smooth running of the engine, even with variable fuel qualities
- ✓ Improves the viscosity of diesel
- ✓ Proven by the HFRR test (DIN ISO 12156)
- ✓ Improves the storage stability of diesel thanks to the use of modern antioxidants
- ✓ Improves ignition properties by elevating the cetane number into the safe range

### Application area

- ✓ For all petrol engines
- ✓ For safeguarding the overall fuel quality
- ✓ For fuel systems exposed to particular strain, e.g. from climatic conditions
- ✓ For eliminating faults due to deposits in the fuel injection area and combustion chamber
- ✓ After using the Injector Intensive Cleaner

### Instructions

Add to the fuel tank.

### Dosing

One can is sufficient for up to 60 litres.

### Notice

- ✓ Filler neck available separately
- ✓ Add the contents to the fuel tank during every inspection or ideally after 5,000 km.

Product Description	Contents	Article Number	Packaging Unit
System Agent Concentrate	200 ml	1101327	24 PCS
Additional accessory		Article Number	Packaging Unit
Diesel Fuelling Hose Filler Neck		1601831	1 PCS
