

Professional 173 System Agent Concentrate

System agent concentrate for all petrol engines. The additive protects against deposits in the whole fuel system and thus ensures optimum fuel consumption and low pollutant emission values.

Properties

- ✓ Clean-up effect cleans and protects inlet valves (for port injection), combustion chamber and outlet valves
- ✓ Keep clean effect prevents deposits in the injection area
- ✓ Ensures the smooth running of the engine, even with variable fuel qualities
- ✓ Modern antioxidants delay the chemical deterioration of the fuel
- ✓ The fuel is activated and acts in the injection area and combustion chamber

Application area

- ✓ For all petrol engines
- ✓ For safeguarding the overall fuel quality
- ✓ For fuel systems exposed to particular strain, e.g. from climatic conditions
- ✓ For eliminating faults due to deposits in the fuel injection area and combustion chamber
- ✓ After using the Injector Intensive Cleaner

Instructions

Add to the fuel tank.

Dosing

One can is sufficient for up to 60 litres.

Notice

- ✓ Filler neck available separately
- ✓ Add the contents to the fuel tank during every inspection or ideally after 5000 km.
